

Event ends in 2 days 15 hours 31 minutes.

[Event dashboard](#) > [Guardrails for Amazon Bedrock](#) > (Optional) Deploy the guardrail

(Optional) Deploy the guardrail

To create a version of the guardrail for deployment, perform the following steps:

1. Select **Guardrails** from the left navigation pane in the Amazon Bedrock console and choose the name of the guardrail that you want to edit in the Guardrails section.
2. Carry out one of the following steps.
 - In the **Versions**, section, select **Create**.
 - Choose the **Working draft** and select **Create version** at the top of the page
3. Provide an optional description for the version and then select **Create version**.
4. If successful, you will be redirected to the screen with a list of versions with your new version added there.
